

## THE WORLD OVER

### "BIRD-MAN MEETS TIMELY END

VINCENNES, France—Clem Sohn, known as the "American Bird Man," was killed Sunday when his plane crashed to open. Sohn jumped from a plane at 8,000 feet before a crowd of 20,000 gathered for air races. He completed a series of evolutions in the sky with the aid of "wings" strapped to his arms. At 1,900 feet he was descending gracefully from the plane above and he attempted to open a parachute. It failed and he plunged to the ground. Spectators nearby rushed the injured man to the hospital but he died en route.

### CANADIAN ESKIMO CRACK SHOT

Free white hunters will tackle a polar bear with a .22 rifle but it is all in a day's hunting with the Canadian Eskimo. He needs food and he needs furs and the polar bear provides both. The manner in which the Eskimo in Canada's Arctic is gradually forcing the harpoon and knife for the rifle is told in an interesting story entitled "Eskimo Target" by Thomas Whelan in the April issue of C.I.T.

The Canadian government has adopted a policy of encouraging the use of firearms for hunting by the Eskimo as they give him a means of earning a living and at the same time a means of safety at close quarters he has never needed, and what is more he has become a crack shot with the rifle which he regards as the most cherished possession.

### CLOSED SEASON FOR FISHING

In an interview given this week by the Hon. N.E. Tanner, Minister of Lands and Mines, emphasis was laid on the fact that a closed season for marine, domestic or fresh water fishing existed at present for all classes of fish.

"Anyone employed in any form of fishing at the present season or being in possession of freshly caught fish or endeavoring to sell the same would immediately become liable to prosecution," the Minister stated.

Instances had occurred lately, Mr. Tanner remarked, of people who had been guilty of an infringement of the regulations in this respect which necessitated a warning being sent to all proprietors of restaurants and hotels to the effect that the purchase of any Alberta fish, other than the frozen product, was at the present time, illegal and subject therefore to the penalties as laid down in the Act.

### B.C. AND YUKON TO BE JOINED

VICTORIA—British Columbia faces the prospect of making a bid to join the Arctic Ocean with announcements by Premier Pattullo that the coast province has reached an agreement with the Dominion to take the Yukon Territory within its boundaries.

The agreement is contingent upon assent of the Dominion parliament and the new provincial Legislature, which is to be elected June 1st.

## MRS. A. G. ANDERSON DIES AT FAMILY HOME; FUNERAL HELD FRIDAY

One of the Old Timers of the  
Carbon District

The death of Mrs. Mary Jane Anderson, widow of the late A.G. Anderson, took place at the family home north of Carbon on Tuesday, April 20th.

The late Mrs. Anderson was born at Sarnia, Ontario 73 years ago and came west with her husband at the turn of the century. She was one of the old timers of the district and as a pioneer citizen she did her part in bringing the district into a favored farming area.

Deceased leaves to mourn her loss four sons, Albert of Edmonton; Merle and Clyde of Carbon, and Ralph of Bergen; three daughters, Mrs. U.F. Nelson of Victoria, B.C.; Mrs. U.F. Peterson of Bergen, Alta.; and Mrs. R. J. Hutchinson of Calgary. Also two brothers, William Malloch of Carstairs, and Robert Malloch of Drumheller. Four sisters also survive. Mrs. William Ayers of Garner, Iowa; Mrs. J.R. Ford and Mrs. W. Sasse of Iowa Falls, Iowa, and Mrs. Jax, Stewart of Broken Bone, Neb.

Funeral services of the late Mrs. Anderson were held from the United Church, Carbon on Friday, April 23rd the Rev. W. H. McDonald officiating. Pallbearers were: Messrs. S.J. Garrett, S.N. Wright, Pete Johnson, Horace R. Costello, and Mr. Patton.

Interment was made in the Carbon cemetery.

### GRASSHOPPER MATERIAL ARRIVES IN CARBON

In anticipation of the annual infestation of grasshoppers in the district the Municipal District of Carbon has received a supply of bran and saw dust, and is being stored in the municipal building opposite the city hall office at the present time. As soon as the grasshopper eggs start to hatch the bait mixing station will commence and will be located in this same building.

According to departmental officials Carbon has not been one of the most heavily infested areas in the province, and these officials urge that farmers keep a sharp lookout for the young hoppers and poison them as soon as possible. This is the only known remedy to combat the pest and unless every farmer looks after his own fields there will be recurrence of the hopper plague again next season.

## WEDNESDAY HALF HOLIDAYS TO COMMENCE MAY 5

It has been the custom in past years for the merchants of Carbon to close their places of business at one o'clock each Wednesday afternoon during the months of May, June, July and August, and a Village by-law decrees that the order must be carried out. Therefore commencing next Wednesday, May 5th, the stores in Carbon must close their doors at 1:00 p.m.

### BOY SCOUT NOTES

## POOL ROOM BROKEN INTO

Another of the Carbon business places was the victim of a robbery on Monday night, this time thieves entering the premises of the Carbon Billiard hall. Entrance was gained, it is said, through the front door, and a large quantity of tobacco and cigaret tins taken.

Constable Shaw of the R.C.M.P. is investigating the crime.

### IVES—MCGRADY

A quiet wedding of interest locally took place in Drumheller on Saturday, April 24th, when Ruth McGrady and George Ives were united in marriage. The young couple will reside in Carbon.

## WEEKLY COMMENT ON THE WORLD OF WHEAT

BY H. G. L. STRANGE

The fondest hopes of thousands of Western farming families were ruthlessly destroyed in 1916 by the germ killer—blast fungus.

"We must help these suffering people," exclaimed Dr. Buller, head of the Botany Department, University of Manitoba. He jumped on a train and proceeded to the rust infested State of Minnesota to find out what the scientists there were doing to combat the enemy.

Dr. Buller's recommendations for Canada's wheat were submitted to Ottawa. Dr. Grisdale, Deputy Minister of Agriculture, and Dr. Gursow, Dominion Botanist, were jointly responsible for the quick allocation of \$5,000 for rust investigation work.

Research Laboratories were soon established at Indian Head and Brandon, then later at the University of Saskatchewan; all under the direction of Professor Fraser.

The same destruction of Western crops by rust, however, occurred again in 1923.

"Much more must be done by the Government to save these crops and homes," urged the Dominion Minister of Agriculture, Mr. Motherwell. Backed up by Dr. Tully of the Research Council, Mr. Motherwell in 1924 obtained from Parliament \$50,000.

The same fund, in 1925, the present Rust Research Laboratory at Winnipeg was built, directed by Dr. Bailey until 1928; since then by the able scientist, Dr. Craigie.

Following factors have tended to reduce the rust situation in Canada, in Australia and most sections need

## CARBON TO CELEBRATE CORONATION DAY WITH A VARIED PROGRAMME

Duke of York Chapter L.O.E.E.  
To Sponsor Program

Carbon is not to be without its Coronation activities on May 12th, when the celebration of the crowning of our new King and Queen will take place.

We understand that the Duke of York Chapter L.O.E.E. are making extensive preparations among the school children and other organizations for a Coronation celebration, to take place in the morning with a parade. While we have no outline of the tentative program at the present time, we hope to be able to publish the plans in an early issue.

The Boy Scouts, under the leadership of Southmaster Hugh Isaac, are doing their part towards the entertainment and a feature of their contribution will be a fire-works display in the evening.

The celebration of the crowning of our King and Queen is a worthy event and one which every citizen of the town and district should lend a helping hand.

### ARBOR DAY, MAY 3

EDMONTON—By terms of an order-in-council Monday night, May 1st, has been set aside as Arbor Day in this province. On this day, governments offer an active help, as well as its cost. It is not a general holiday. Schools, business houses and other wheels in the economic machine will keep turning, although many schools and organizations will commemorate the occasion by planting trees.

Sent in any local news you may know of the Carbon Chronicle. We are always glad to get it and there is no charge for "news items."

rain, Chili prohibits wheat exports. Holland reduces import duties on all wheat and corn. French Morocco temporarily ban barley exports. China reduces import duties on rice. Spain agrees an active wheat buyer. Price of gold unlikely to be reduced in Gt. Britain or the U.S.

Following factors have tended to reduce the rust situation in Canada, in Australia and most sections need

## WHEAT SEEDING SHOULD BE COMPLETED SAT'DAY

With ideal weather following the rain last week the land soon dried sufficiently to allow seeding to resume by the end of the week. This week the farmers are practically all busy drilling in the seed and given favorable weather about 90 per cent of the wheat should be in the ground in the district by Saturday night.

Some farmers have commenced to seed their course grain, and others report that they have finished their entire seeding operations.

An attempt is being made by prominent Social Crediters to have an additional allowance made for the Carbon district to provide more seed grain to farmers who are short, and we understand that E.P. Foster, M.L.A. is giving the matter considerable attention at the present time.

## LONG YEARS AGO

May 1, 1924

With the closing out of the Bank of Toronto this week, R.F. Joyce, the manager, has been transferred to Prosserville, Sask., and J. Fuller to Oyen, Alberta.

Although the strike is still in progress an attempt was made this week to re-open the Stoppage mine, when 16 men went to work. The strikers have placed a strong picket at the entrance, although no violence is expected.

Harry Thorburn has purchased a confectionary business in Calgary.

A. J. McLeod is building a new bungalow on his farm.

School report for Grade 11 Set-

BY THE S. M. C.

### TO THE LOCAL CITIZENS

Last Saturday the Scouts were unanimously in favour of sponsoring a Community Fund to provide for the purchase of 21 Coronation rockets for the Coronation Day Celebrations. They started the fund with a donation of \$1.00.

Since they asked me to do the joyful work of collecting for the fund, I trotted around and was agreeably surprised at welcome and wholehearted support. I received at each visit. The result to the moment of writing is a total of \$15.50.

Being pressed for time, was unable to call on many others that I intended to, and I would not like to feel that I have hurt anyone's feelings by not having called. Seeding keeps one busy, yet if I can manage it, I will try to find time to repay the omission.

## ELEVEN MILLION ACRES TO BE CROPPED IN ALTA.

The seeding season is here again and Alberta farmers are engaged on the important task of sowing some eleven million acres of land, with the hope that nature will be favourably disposed this year and provide weather suitable for a bounteous harvest.

What is the main crop, of course, and more than seven million acres will be devoted to growing this cereal. Next comes oats. Some parts of Alberta are particularly fitted for the production of oats and it is always an important crop in this province.

Around 2 1/2 million acres will be seeded to this grain. Barley is a favorite crop in some sections and occupies about a million acres.

The last of sowing eleven million acres is one of considerable magnitude, but Alberta farmers usually accomplish the task expeditiously when the weather is favourable.

The use of modern machinery has increased in late years, and this spring there has been an heavy demand for tractors.

Norman Nash, Sylvia Atkinson, Myrtle Oliphant.

### Dried Young Grass A Concentrated Feed

Every farmer knows that pasture of early spring poses exceptional nutritive properties, and some are aware that these virtues are due to the high protein, mineral and vitamin content of the herbage at that time. Out of this knowledge has grown an appreciation of the principles of pasture improvement and grazing management. Pastures, fertilized judiciously and grazed fairly closely may be made to retain in a large measure the desirable nutritive qualities that characterise the herbage of early spring.

Success has at last rewarded the efforts of investigators in Britain who have been occupied for years with the problem of drying grass economically by artificial means and preserving for winter feeding a concentrated product retaining nearly 100 per cent of the food value of fresh grass without substantial loss of dry matter, digestibility, energy value or vitamins. A ton of artificially dried grass has been shown to possess twice the nutritive value of a ton of average quality hay, and the dried grass, being itself a high-protein concentrate, replaces purchased feeds.

The new method of drying grass artificially is taking hold rapidly in the

British Isles, and Professor R.G. Stapledon of Aberystwyth, Wales, is among its most enthusiastic supporters. "In drying of grass," he said, "all the nutrients leave the soil and reach the barns. The drier of grass must therefore fertilize generously."

A Farmer's Belief

Convinces the Old Man

Some years ago, a Canadian, engaged in conducting fertilizer demonstration sugar beets in Michigan, called on a farmer, in the Saginaw district and offered him two bags of fertilizer to try out. The offer was refused flatly; the farmer had never used commercial fertilizer and had no faith in them. Wishing to be rid of the two bags he had in the back of the car the Canadian was granted permission grudgingly to leave them in the shed until he should call for them later. That was in the spring. In the fall he called again and inquired of the farmer's son concerning the fertilizer. "Oh told the youth," the old man said, "I was away I put it on about an acre of best land, and I want you to see the crop." In the field they found Dad contemplating the fertilized area. "Was a changed man since spring, admitting frankly that the fertilizer had increased the yield by at least 50 per cent and commending his son's enterprise in making the experiment."

## CARD OF THANKS

The family of the late Mrs. Mary  
Jane Anderson wish to thank their  
many friends for all kindness and  
sympathy shown to them during their  
recent bereavement.

## KNOW THYSELF

(By Rev. W.H. McDonnald)

Over the entrance to a famous an-  
cient university were carved the words  
"Know Thyself." Making grateful  
acknowledgement to Prof. Overstreet  
we shall in a brief way put forward  
a few ideas about knowing ourselves.Psychology is the science of human  
behaviour. It is so new that many  
refuse to acknowledge it as a science.  
There is probably more nonsense writ-  
ten about psychology than on any other  
topic.First there is the question of being  
mature or really grown up. How many  
are mature? Do you regress to the  
infantile by pushing off the disagree-  
able, giving in to tantrums or loud-  
mouthed fussing or other forms of  
self-indulgence known as chip-on-the-  
shoulder disagreeableness? If so you  
are not grown up.Self control involves adjustment in  
actual ways to the natural and also  
to the human environment. Can you  
live with folk without childishly de-  
manding your own way? Certain de-  
finite symptoms are recognizable in  
the infantile retreat from mature self-  
control. Consider these phenomena as  
examples: that the craze for fun after  
the war was actually a retreat from  
real problems which we were too  
tired or afraid to face; that thol-  
ly in an infantile type even when he  
is found in adult life; that cussing  
when things go wrong is another in-  
dication of children in trousers. Little  
children want their own way regard-  
less until they learn to respect other  
folks as having rights.Have you not known folk who take  
flight from real problems into humo-  
rable disease? Sympathy is much  
easier to endure than struggle and  
discipline.The only truly mature person is the  
one who has attained within him-  
self the power and courage to face  
situations squarely and to call them  
by their right names.

## Snicklefritz-----

Why are you looking so dejected?

"I've gone and lost my best friend."

"How come?"

"I just loaned him ten dollars."

A modern girl adores spinning  
wheels but she wants four of them  
and a spare.Tommy came out of a room in which  
his father was tucking down a carpet.  
He was crying lustily.

"Why, Tommy, what's the matter?"

asked his mother.

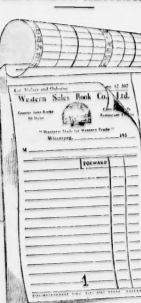

"P-p-papa hit his finger with the  
hammer," sobbed Tommy."Well, you needn't cry at a thing  
like that," comforted his mother.

"Why didn't you laugh?"

"I did," sobbed Tommy.

And now, Farmer Jorgens, how do  
you manage to get on those hard  
times?Farmer: "Oh, last year we lived on  
faith; this year we are living on hope,  
and next year, if all goes well, we  
will be living on charity."A mountaineer took his son to a  
school to enrol him."My boy's arter larmin'. What d'ya  
teach?" he asked the teacher."We offer English, trigonometry,  
spelling, etc.," she replied."Well, give him some of that thar  
trigonometry; he's the worst slat  
in the family."YOU CANNOT produce busi-  
ness with the machine produce  
rabbits from a hat. It takes  
something more than made to  
keep the wheels of industry  
turning today. The surest  
method is by constantly tel-  
ling people what goods or ser-  
vices you sell and why they  
should buy them. Good  
printing plays an important  
part in helping you in both  
planning and execution.

THE CARBON CHRONICLE"Somebody  
to see you!"IF EVERYBODY with something to interest you  
should come and ring your bell, what a nuisance  
it would be. Think of the swarming, jostling crowd,  
the stamping of feet on your porch and carpet!Every week we know of many callers who come  
to see you. They never jangle the bell—they don't  
take up your whole day trying to get your attention.  
Instead, they do it in a way that is most considerate  
of your privacy and your convenience. They adver-  
tise in our newspaper!In this way you have only to listen to those who  
know at a glance have something that interests you.  
They make it short, too, so you can rather quickly  
just what you want to know. You can receive and  
hear them all without noise or confusion in a very  
few minutes.In fairness to yourself look over all the adver-  
tisements. The smallest and the largest—you never  
can be sure which one will tell something you really  
want to know.Think what this won-  
derful offer will mean  
in enjoyment through-  
out the whole year for  
yourself and your fam-  
ily. Magazines of your own choice and  
this newspaper, packed with stories, time-  
ly articles, helpful departments and color-  
ful illustrations. Now is your chance.
